

Medical Microbiology Clinical Privileges

Name: _____

Effective from ____/____/____ to ____/____/____

Initial privileges (initial appointment) Renewal of privileges (reappointment)

All new applicants must meet the following requirements as approved by the governing body, effective: June 4, 2013.

Applicant: Check the "Requested" box for each privilege requested. Applicants are responsible for producing required documentation for a proper evaluation of current skill, current clinical activity, and other qualifications and for resolving any doubts related to qualifications for requested privileges. Please provide this supporting information separately.

[Department/Program Head or Leaders/ Chief]: Check the appropriate box for recommendation on the last page of this form and include your recommendation for any required evaluation. If recommended with conditions or not recommended, provide the condition or explanation on the last page of this form.

Current experience is an estimate of the level of activity below which a collegial discussion about support should be triggered. It is not a disqualifier. This discussion should be guided not only by the expectations and standards outlined in the dictionary but also by the risks inherent in the privilege being discussed and by similar activities that contribute to the skill under consideration. This is an opportunity to reflect with a respected colleague on one's professional practice and to deliberately plan an approach to skills maintenance.

Other requirements

- Note that privileges granted may only be exercised at the site(s) and/or setting(s) that have sufficient space, equipment, staffing, and other resources required to support the privilege.
- This document is focused on defining qualifications related to competency to exercise clinical privileges. The applicant must also adhere to any additional organizational, regulatory, or accreditation requirements that the organization is obligated to meet.

Note: The dictionary will be reviewed over time to ensure it is reflective of current practices, procedures and technologies.

Grandparenting: Physicians holding privileges prior to implementation of the

Medical Microbiology Clinical Privileges

dictionary will continue to hold those privileges as long as they meet currency and quality requirements.

Definition: Medical Microbiology is a branch of laboratory and clinical medicine concerned primarily with the diagnosis, treatment and prevention of infectious diseases. The specialty of Medical Microbiology consists of four general spheres of activity:

1. Scientific development and administrative and clinical direction of a microbiology laboratory based on quality management principles.
2. Clinical consultations, in both inpatient and outpatient settings, on the investigation, diagnosis, treatment, and prevention of infectious diseases.
3. Infection Prevention and Control (including antibiotic stewardship)
4. The epidemiology of communicable diseases.

Qualifications for Medical Microbiology

Initial privileges: Either:

Certification in Medical Microbiology by the Royal College of Physicians and

Surgeons of Canada; OR

Recognized as a medical microbiologist by the College of Physicians and Surgeons of British Columbia by virtue of credentials earned in another jurisdiction that are acceptable to both the College and the Health Authority and its Affiliate(s).

AND

Recommend current experience: Either:

Full- and/or part-time Medical Microbiology services, reflective of the scope of privileges requested, for average of 8 weeks per year over the prior 3 years;

OR

Successful recent completion of a Royal College of Physicians and Surgeons of Canada residency in medical microbiology (or equivalent);

OR

Clinical/research fellowship immediately following residency within the past 12 months.

Medical Microbiology Clinical Privileges

Renewal of privileges: To be eligible to renew privileges in Medical Microbiology, the applicant should meet the following criteria:

Current demonstrated skill and an adequate volume of full- or part-time experience, with acceptable results, reflective of the scope of the privileges requested, (minimum of 24 weeks working in the discipline for the past 36 months) based on results of ongoing professional practice evaluation and outcomes.

Return to practice: Individualized evaluation at an academic training center that regularly trains Medical Microbiology residents, with supervision of core procedures relevant to their intended scope of practice.

Core Privileges: Medical Microbiology

Core privileges are offered to ALL members in the discipline as long as the facility can support those activities.

❑ Requested

Patient investigation, diagnosis, treatment, and prevention of diseases caused by microorganisms, for patients of all ages. Medical oversight/clinical direction of the medical microbiology laboratory, infection prevention and control, and antibiotic stewardship. May provide care to patients in the intensive care setting in conformance with unit policies. Assess, stabilize, and determine the disposition of patients with emergent conditions consistent with medical staff policy regarding emergency and consultative call services. The core privileges in this specialty include the procedures on the attached procedures list and such other procedures that are extensions of the same techniques and skills.

Core Procedures List

This is not intended to be an all-encompassing procedures list. It defines the types of activities/procedures/privileges that the majority of practitioners in this specialty at this organization would competently perform, and inherent activities/procedures/privileges requiring similar skill sets and techniques.

To the applicant: If there is a procedure you wish to NOT perform, then please type into the *Comments* field.

▪ Clinical Consultation

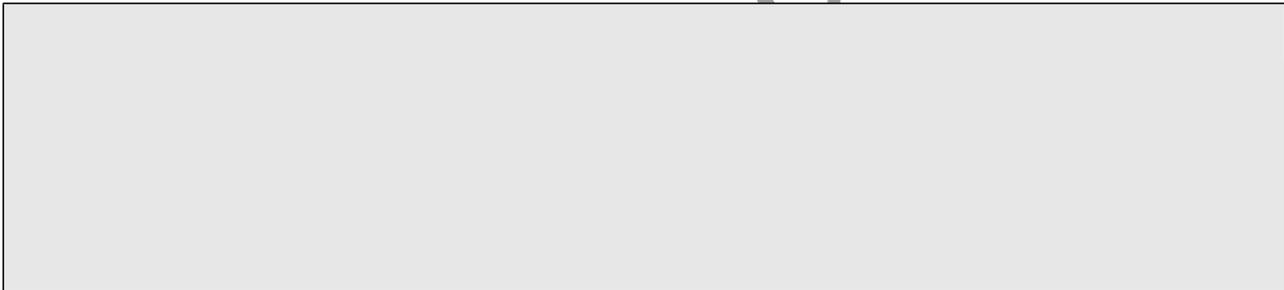

- Clinical consultation including investigation, diagnosis, treatment, and prevention of infectious diseases with or without direct patient care.

▪ Medical Laboratory

Medical Microbiology Clinical Privileges

- Medical oversight/clinical direction of:
 - All processes required for a comprehensive diagnostic medical microbiology practice
 - Development and implementation of new or changing technologies
 - Quality management systems
 - Laboratory safety
- **Infection Prevention and Control**
 - Medical oversight/ clinical direction of Infection Prevention and Control programs
 - Clinical consultation for infection prevention and control
 - Epidemiology and surveillance of communicable and health care associated infections
 - **Antimicrobial Stewardship** Medical oversight/ clinical direction of **Antibiotic Stewardship Program**
 - Clinical consultation for antibiotic stewardship
 - Epidemiology and surveillance of antibiotic use and susceptibility patterns

Non-core Privileges: Electron Microscopy

Requested

Initial privileges: The applicant has completed training to the satisfaction of the Regional Medical Director for Lab Medicine.

Renewal of privileges: The applicant has spent 24 weeks in the last three years working in a personal practice of medicine that included electron microscopy as regular modality.

Non-core Privileges: Oversight, interpretation and reporting of virus isolation

Requested

Initial privileges: The applicant has completed training to the satisfaction of the Regional Medical Director for Lab Medicine.

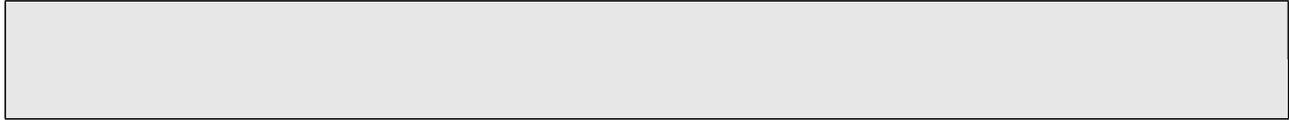

Renewal of privileges: The applicant has spent 24 weeks in the last three years

working in a personal practice of medicine that included virus isolation as regular modality.

None identified at this time.

For Reference Only

Medical Microbiology Clinical Privileges

Process for requesting privileges not included in the dictionary

Where a member of the medical staff requests a privilege not included in the core, non-core or context specific privileges for a discipline, the following process will be followed.

1. The practitioner will request a **Change Request Form** from the Medical Affairs Office. This will be submitted to the head of department or chief of staff as part of the electronic application process
2. The practitioner will complete the privileges section of the **Change Request Form** and submit with the following information; the privilege requested, the location within the facility where the privilege would be exercised, and the relevant training and experience held by the practitioner in this area.
3. The department head or chief of staff, in consultation with the senior medical administrator and medical administrator responsible for the facility, will determine if the requested privilege can be supported at that site.
4. Where it is deemed appropriate, the practitioner, the department head or chief of staff and the senior medical administrator will agree on any additional training required, and a minimum level of activity required to maintain the privilege. The specific minimum number requirement indicating the level of experience needed to demonstrate skill to obtain clinical privileges for the requested procedure must be evidence-based. Where no supporting literature exists for a specific number, the criteria are established by the consensus of a multidisciplinary group of practitioners who do not have self-interest in creating an artificially high volume requirement.
5. Any additional training will be done in a facility that normally trains practitioners in this activity. Exceptions may be granted in circumstances where all that is required is training by a member of the medical staff who holds the privilege in question.
6. On satisfactory completion of training, the department head or chief of staff may recommend to the governing body through the medical advisory committee that the privilege be granted.

The privileging dictionaries on this site (bcmqi.ca) are the official versions. They will be reviewed beginning in 2016. In the meantime if you have any questions or comments please contact your medical administration office or the BC MQI Office by completing the [Provincial Privileging Dictionary Feedback form](#).

Medical Microbiology Clinical Privileges

I have requested only those privileges for which by education, training, current experience, and demonstrated performance I am qualified to perform and for which I wish to exercise at the facility I am applying, and I understand that:

- a. In exercising any clinical privileges granted, I am constrained by hospital and medical staff policies and rules applicable generally and any applicable to the particular situation.
- b. Any restriction on the clinical privileges granted to me is waived in an emergency situation, and in such situation my actions are governed by the applicable section of the medical staff bylaws or related documents.

Signed: _____ Date: _____

I have reviewed the requested clinical privileges and supporting documentation for the above-named applicant and:

- Recommend all requested privileges
- Recommend privileges with the following conditions/modifications:
- Do not recommend the following requested privileges:

Privilege Condition/modification/explanation

Notes: _____

Name of Department / Division / Program: _____

Name of Medical Leader: _____

Title: _____
